LED Modular Recessed Lighting System

Introduction

The ML Concept

The HALO™ Modular LED recessed lighting system provides a broad range of lighting solutions ideal for residential and commercial use including single and multi-family dwellings, hospitality, retail, office and institutional spaces. The ML family delivers the energy savings, long life and sustainability of LED with excellent optical control providing cost effective and visually comfortable lighting.

Apertures include full cone reflectors, baffles, open and lens wall washers and directional styles. These combinations provide useful distributions including ambient, task, wall wash and accent facilitating a balanced lighting layout. Choose from round or square forms and a broad range of finishes to complement any décor.

LED module and trim combinations are compatible with industry standard 4, 5 and 6 inch housing types and can be used for new construction as part of the electrical rough-in or install from below - ideal for remodeling applications. They can also be retrofit into existing housings enabling older light-source technologies to be easily upgraded to LED.

With a color rendering index (CRI) of 90 minimum the ML family delivers excellent color quality and can be specified in field selectable 2700, 3000, 3500, 4000 and 5000K correlated color temperature (CCT). It can be used to meet the IECC and the State of California Title 24 high efficacy luminaire compliance. Consult the California Energy Commission Title 20 Appliance Efficiency Database for current listings. Meets the State of California voluntary lamp standards. Most combinations are ENERGY STAR® listed, reference qualified product listing.

D2W™

Select ML combinations are available in the D2W dim-to-warm option mimicking the black body dimming response of tungsten halogen lamps warming the output from approximately 3000 to 1800K or 2700 to 1800K CCT.

- Dims smoothly from 3000K to 1800K or 2700 to 1800K creating a rich, warm glow within the space.
- Maintains 90 CRI throughout the dimming range.
- Available in 600 lumen output.
- Use the same 120V dimmers as with any of the ML4 and ML56 LED modules.

ML4

4-inch LED downlighting system

The ML4 system is comprised of an LED module that can be installed in a canless solution or a retrofit solution. This compact LED module installs from below the ceiling into either a 3-3/4" opening or a 4-inch line voltage housing suitable for 2x6 residential framing or shallow plenum commercial construction.

For even tighter spacing use the canless installation or an ultra-shallow install from below housing which are suitable for 2x4 framing. For ceiling types that make recessed lighting difficult, like concrete pour, round and square surface cylinders support direct attachment to finished ceiling surfaces.

The ML4 delivers powerful beams of light providing optical control and high color quality.

ML4 Module / Optic

Balance efficiency with optical control

The ML4 module combines a chip on board LED array, driver and heat sink into an integrated light engine providing a highly efficient and reliable source of light. The precision molded optic organized the source flux producing tightly controlled and useful beams of light.

The ML4 module is delivered with a 40° flood optic pre-installed and is suitable for a wide range of applications. Alternate beam patterns, 25° narrow flood, 55° wide flood, and 25° asymmetric wall wash are available as accessories and are easily interchangeable in the field. Each optic includes a media holder integral with the optic and accepts industry standard 2" diameter lenses provided additional creating control.

ML4 Trims

The finishing touch

TL4 series trims are offered in four luxurious electro-plated finishes; brushed nickel, oil rubbed bronze, brushed copper and German bronze. Use to complement your thoughtfully selected interior finishes.

The TL4 trims are available in three trim types; open, lens, and lens wall wash.

The trims are attached by four powerful rare earth Neodymium magnets; they float on a bubble of magnetic flux keeping the trims held securely in place.
