Solutions

Cooper Lighting Solutions CORE Locate leverages the WaveLinX PRO sensors embedded in lighting fixtures to provide environmental monitoring capability and location information for assets and people with precision.

CORE Locate enables seamless data exchange with third party system via industry standard protocols and building automation interfaces.

In addition to open platforms for integrations, we offer wearable IoT tags, intuitive web-based software, and a robust location engine, making CORE Locate ideal for schools, colleges, universities etc.

Smart Spaces
information

When it comes to school safety, visibility is critical.

Gain peace of mind with real time notifications of threats or irregularities.

Facility Management:

Manage the entire system through a single user interface

- Respond to the change in light level requests easily and quickly
- Create area scenes and schedules to shift mood and perception
- Allow users to control, set levels and tune individual lights from a graphical floorplan
- Create schedules to disable wall stations during the day in classrooms

Staff, Student and Visitor Safety:

Monitor the exact location of people within the facility to ensure easy and immediate evacuation during emergency

- Historical location reporting
- Get real time location information
- Get alerts when staff is in distress using the push button tags
- Setup emails, text alerts to receive notifications
- Get notified immediately when visitors enter unauthorized areas
- Locate visitors in the facility

Contact Tracing:

Prevent and control infections in your facility

- Analyze location history to understand who came in contact with whom and for how long

Environmental Monitoring:

Ensure staff and student wellbeing by providing a comfortable environment

- Get historical temperature reports
- Get real time notifications when thresholds are breached
- Monitor room conditions to maintain appropriate level of humidity and temperature in classrooms, staff rooms etc.

Asset Management and Utilization:

Keep tab on your school's assets

- Ensure valuable equipment's and electronics don't leave school property without authorization
- Save time searching for equipment

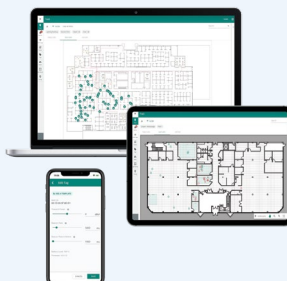

Analytics:

Improve day to day operations

- Monitor capacity
- Room utilization rates
- View equipment status
- Utilize data to identify trends and bottlenecks

WaveLinx CORE Partner Program

Our partner ecosystem enables developers and system integrators to leverage the data gathered by the WaveLinx CORE Platform to create brilliant customer experiences. Using APIs, systems can collect valuable data from the WaveLinx CORE platform—such as spatial organization, space usage, asset information, and asset location— to deliver fully-integrated solutions.

Together...
we can make every space limitless
