

Product Use Case: Metalux Cruze The Bridge Community Center

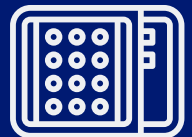

Background

Originally built in 2008, The Bridge is a ministry of Peachtree City's First Baptist Church. From fitness classes to a game room and multi-purpose meeting spaces, the facility is free for public use. Like all nonprofits, The Bridge is constantly seeking cost-cutting opportunities, and decided to make the switch from their original fluorescent fixtures to more energy-efficient LEDs.

fixtures installed

Challenge

The Bridge, a bustling, nonprofit facility offering free community activities and meeting spaces, was searching for a solution to reduce energy costs and improve the space's aesthetics by replacing their outdated fluorescent fixtures.

Solution

Metalux Cruze LED Retrofit Kit
