

THE NEW BENCHMARK IN  
**OUTPUT AND  
PERFORMANCE**

SB Light Engine

GALN Galleon II

### ENHANCED PERFORMANCE & EFFICIENCY

Specified for maximum performance, the all new SB light squares deliver up to 40% more output, enabling the Galleon II to achieve over 102,000 lumens and up to 178 lm/W efficacy. This high-output design reduces the number of fixtures and poles required, streamlining installation while reducing material and labor costs.

### SUSTAINABLE, LONG-TERM VALUE

The SB light squares are field-rotatable and field-replaceable, allowing individual components to be updated at end-of-life without replacing entire fixtures. This modular design minimizes waste, keeps fixtures out of landfills, and ensures long-term adaptability for evolving commercial needs.

### VERSATILE DESIGN OPTIONS

Galleon II stands as the most configurable area & site solution in the world, providing unmatched flexibility for diverse applications. Whether illuminating expansive parking areas, tennis courts or automotive dealerships, its site-specific configurability ensures optimal light distribution for virtually any outdoor application.

## APPLICATIONS
