Product Features

Top Product Features

- Heavy-duty diecast aluminum housing
- XHB housing constructed for durability and optimal thermal control
- Available in 60,000 and 85,000 lumen packages
- cULus listed for wet locations
- IP66 listed and rated for up to 65C ambient

Order Information

SAMPLE ORDER NUMBER: **XHB-LD1-60-W-V2-L850-MM-BLK-JB-FO-U**

All values are measured under laboratory conditions at 25 °C. Actual performance may differ as a result of end-user environment or application.

Power Quality

Pure power is required to ensure proper function and lifetime of Cooper Lighting Solutions fixtures. Prior to installation, an analysis should be performed to verify site power meets these requirements

- High frequency voltage shall be below -40dB or .01V between 3KHz and 100KHz.
- High frequency current shall be below -50dB or .019A between 3KHz and 100KHz.

If the power does not meet these criteria, waveform correction technology should be used to condition the power. Surge protection alone is not adequate. If you require assistance in checking your power system or designing or implementing solutions, contact Eaton's Electrical Engineering Services and Systems. Find more information at www.cooperlighting.com.

Failure to ensure power quality requirements shall void warranty.

Product Specifications

Construction

- Heavy-duty diecast aluminum housing for added durability and thermal control
- Enclosed fixture design is IP66 rated - suitable for demanding and complex environments

Electrical

- Long-life LED system coupled with electrical driver to deliver optimal performance
- Available in 4000K and 5000K at ≥ 80 CRI
- cULus listed
- Electronic driver is available for 120V-240V and 277V-480V applications
- Control features include standard fixed output or optional 0-10V dimming

Finish

- Standard black polyester powder coat finish painted after fabrication for increased durability and rust inhibition

Optics

- Precision designed optics deliver highly efficient illumination
- Narrow, medium, wide and extrawide distribution ensures superior performance to key areas within an application

Mounting

- XHB multi-mount is suitable for suspension mounting with various mounting options
- 3/4" NPT internal thread with locking set screw
- Optional surface mount, and adjustable arm mount available

Compliance

- Luminaires are cULus listed for wet locations -40°C to 65°C ambient environments with 0-10V drivers (max 50C for 85K lumen - see chart)
- IP66 listed
- RoHS compliant
- NEMA 4X
- LED modules comply with IESNA LM-79 and LM-80 standards

Warranty

- Five year warranty.
