

Streetworks Caretaker Connect

Caretaker Nano with Trellix Infrastructure Cellular Control

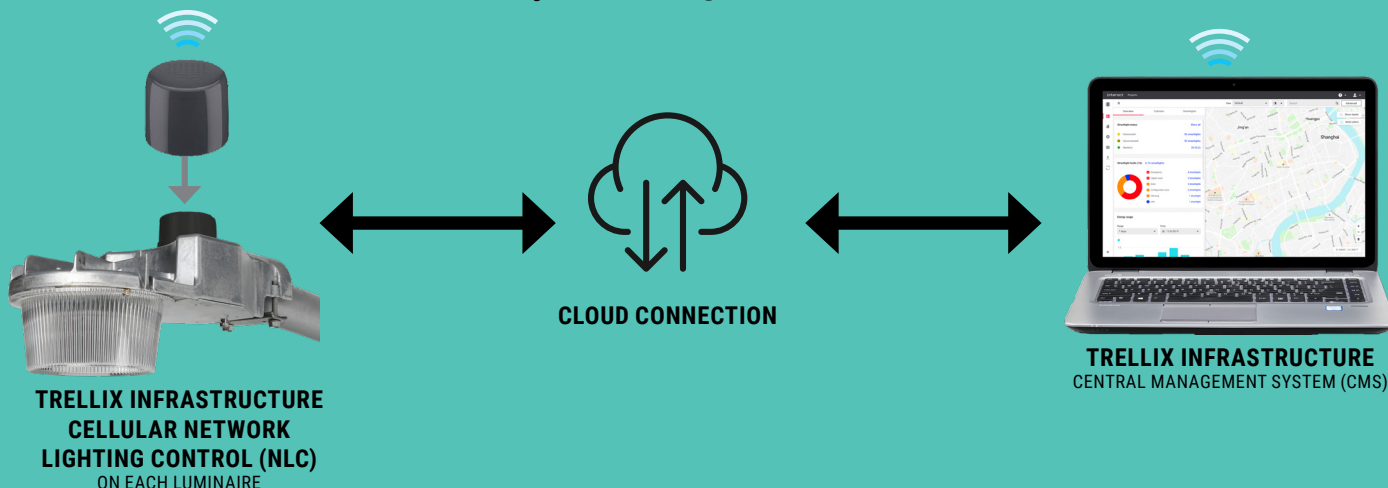

Fixture and Pre-installed Control in Single Pack

Caretaker Connect offers fully remote connectivity and control, eliminating the need for on-site visits, reducing manpower costs, and improving safety with a simple, all-in-one installation package.

Caretaker Connect

Caretaker Connect simplifies utility lighting operations with remote cellular connectivity. Manage lighting assets from a centralized dashboard without on-site visits thus reducing costs and improving worker safety. This single SKU offering provides hassle-free installation, improved serviceability along with fast and effective response to customer issues.

System Diagram: Cellular

Cost Saving Benefit Features

Fully remote connectivity

Cellular connectivity - remote on/off from your office - no need to visit site

Eliminates truck roll and manpower

No more expensive truck rolls to turn off or re-establish service

Improved safety

The elimination of site visits enhances safety for utility workers, reducing the risk of accidents and injuries.

No delays in managing customer issues

Customer issues, billing, and on/off switching of fixtures can be managed immediately, ensuring better quality of service.
