| WaveLinx Pro Mobile Application | Mobile application for configuration and control of WaveLinx Area Controller and WaveLinx Pro system |

---

[1] WaveLinx Pro app distributed via Apple's App Store and Google's Play Store.

## FAQ

1.  *When were WaveLinx Wireless Area Controller and WaveLinx Pro Mobile App released and what for?*

(a) WaveLinx Wireless Area Controller (WAC) and the WaveLinx Pro Mobile App were originally released in Nov 2017. The WAC is the main component of the WaveLinx Wireless Connected Lighting System, coordinating between the WaveLinx Pro Mobile App and your WaveLinx-enabled fixtures and devices to create communications and a building ecosystem that provides out-of-the-box functionality. The WAC provides centralized coordination of multiple areas for partial ON/partial OFF scheduling, demand response, lighting, occupancy and daylight settings and scene control. Its typical applications are Office, Education, Healthcare, Hospitality, Retail Industrial and Manufacturing.

(b) WaveLinx Pro Mobile App enables users to perform setup, configuration and maintenance of the WaveLinx system from a wireless smartphone or tablet. It allows users who perform the setup to easily define areas of the building and drag and drop compatible WaveLinx PRO devices into lighting zones in each area. The WaveLinx Pro Mobile App also enables users in the building to have personal control of the lighting in the area they are located.

2.  *Why phasing out of these controller applications?*
CLS released the WaveLinx Wireless Area Controller Gen2 to offer improved features and performance.
CLS also released the WaveLinx Pro Mobile App Gen2 that is compatible with WaveLinx Wireless Area Controller Gen2.

3.  *Will there be a successor for Wireless Area Controller and WaveLinx Pro Mobile App?*
Yes, there is Wireless Area Controller Gen2 with improved features and performance and WaveLinx Pro Mobile App Gen2.

4.  Will Wireless Area Controller Gen1 be compatible with Trellix Core appliance?
The Trellix Core appliance with software version 9.0 can communicate with both Gen 1 and Gen 2 WACs. However, the upcoming Trellix Core version 10 will not support Gen 1 WACs, requiring customers to upgrade if they want to utilize the latest software features.
