Product Features

Top Product Features

- 4" linear system with superior performance and architectural appeal
- 4' and 8' lengths available with up to 1000 lumens per foot
- Unique endcap simplifies installation in rows or individual mounting
- 3000K, 3500K, 4000K CCT at 80 or 90 CRI
- UNV 0-10V 1% dimming standard with Lutron and Dali control options
- Options to meet Buy American Act requirements

Notes (6) Only product configurations with this designated prefix are built to be compliant with the Buy American Act of 1933 (BAA). Please refer to DOMESTIC PREFERENCES website for more information. Components shipped separately may be separately analyzed under domestic preference requirements.								Notes (1) 347 volt options only available with standard 0-10V driver.	Notes (2) With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). Battery section is 4" and located in the first half of an 8' fixture. Battery is remote mounted with ATW-SW4 option. The indicator and test switch is mounted externally in a separate J-box with flex conduit.

Notes (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com .		Notes (3) Sensor options are only available with standard (Blank) driver option. Integral sensors available With flush frost lens only. (A) Consult WaveLinx system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.		Notes (5) Product is equipped with full length 14 gauge hot, neutral and ground wires with connectors to enable end to end wiring. Runs up to 185 feet at the highest output can be supported without additional PI/CPi wiring. For continuous runs greater than those listed in the performance details below, PI/CPi harness is required.

Product Specifications

Construction

- Extruded aluminum rails with code-gauge sheet metal housing
- Sheet metal endcaps with KO and offset for "troffer-like" through wiring for easy row mounting
- Nominal 4' and 8' illuminated sections
- Narrow aperture (under 3") with 4 inch grid spacing
- These fixtures may have MWS (Modular Wiring System) added. Consult factory for details.

Integrated Controls

- 0-10V dimming to 1% standard
- WaveLinx sensor compatible for IoT capability
- SVPD sensor compatible for out of the box functionality
- DALI 2.0 and Lutron available

LED and Light Engine

- LED's available in 3000K, 3500K, or 4000K at 80 CRI minimum and 90 CRI minimum

Emergency Battery Options

- Optional 120-277V emergency battery available in 7W or 14W
- 90-minute backup period for code compliance
- Test switch with laser pointer and testing from floor feature for ease of use
- EZ Key feature prevents accidental discharge during construction

Finish

- Full fixture housing, endplates and rails are painted after fabrication
- Fixture housing is white, electrostatically applied, polyester powder coat paint
- Aluminum rails are matte-white

Shielding

- Frosted flush lens standard
- Optional frosted flush asymmetric lens (A option) available from factory or as accessory for field installation where needed

Compliance

- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- NYC compliant
- Tested to IESNA LM-79 and LM-80
- Stated life tested to TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

Warranty

- Five year warranty standard.

Example Lumen Adjustment Calculations

8RCG-4-56D-L935-U, 90CRI at 3500K

Lumen Adjustment Factor = 0.861

Total Light Output =

4,469 lm x 0.861 = 3,848 lm

Efficacy = 3,848 lm / 37.2W = 103 lm/W

The RCG with Integrated Sensor technology provides automatic energy savings without sacrificing performance. The RCG delivers superior lighting with integrated occupancy and daylighting controls.

For standalone and controlled applications, the WaveLinX Lite integral sensor provides out-of-the-box functionality with no gateways required and factory startup is not needed.

When more connectivity is required, the WaveLinX Wireless sensor meets modern code and utility requirements, delivers energy and cost savings, while enabling buildings to become smart buildings.

The WaveLinX Wireless Connected Lighting System combined with Trellix provides an open IoT platform and infrastructure that connects intelligent sensors leveraging the real-estate of the physical light fixture to solve higher complexity problems to deliver actionable insights through the aggregation of valuable data.
